

MATERIAL HOIST

ANKA material hoists are the right solution for vertical lifting of material at all construction sites. Material hoists is a good addition to tower cranes, the purpose being to carry materials, and equipment quickly between the ground and higher floors, or between floors in the middle of a structure. Anka material hoists are a very efficient, economical and safe alternative to conventional construction hoists and is assembled with the same basic components like mast, electrical drive unit and platform decks. For precisely controlled travel along the mast sections, modern construction hoists use a motorized rack-and-pinion system that climbs the mast sections at various speeds.

Model # SC 200H to SC 360H

Fast Facts

CAPACITY	
Lifting capacity	1000 kg-3600kg
Material only	
Speed	7m/min-25m/min
Rated lifting heights	0-250m
DIMENSIONS	
Mast section length	1.508mm
Door opening	1m - 1.5m
ELECTRICAL DATA	
Power Supply	360V - 480V
Motor Drive	7.kW - 25kW
